PROFESSIONAL SUMMARY

Product Designer with hands-on experience designing user-centered web and mobile products — covering user flows, wireframing, interactive prototyping, and design systems in Figma. Skilled at translating product requirements into responsive, accessible interfaces and preparing clear design specifications for developer handoff. Uses AI-assisted design tools, including Figma AI, ChatGPT, and Claude, to accelerate research, ideation, and rapid prototyping.

PROFESSIONAL EXPERIENCE

UI/UX & Graphic Designer, Indo-Sakura Software Japan

Sep 2025 – Present

- Owned end-to-end design for web and mobile features — from user flows and wireframes through high-fidelity UI and interactive prototypes — ready for stakeholder review and developer handoff.
- Built reusable Figma components, variants, and design system patterns to support scalable, maintainable UI work across the product.
- Improved information architecture, navigation, and responsive layouts across existing product interfaces.
- Partnered with stakeholders through iterative design reviews, refining user flows and visual design based on feedback.
- Prepared organized design specifications and assets to support efficient, low-friction developer handoff.
- Applied AI-assisted design workflows — including Figma AI, ChatGPT, and Claude — for UX research, ideation, and rapid prototyping.
- Produced supporting visual design assets for product marketing initiatives as needed.
